BUTTRESS THREAD RUN-OUT GAUGE

2238-4

Unit: mm

Ø40

26

SR1.45
movable probe

50.8

2

99

application

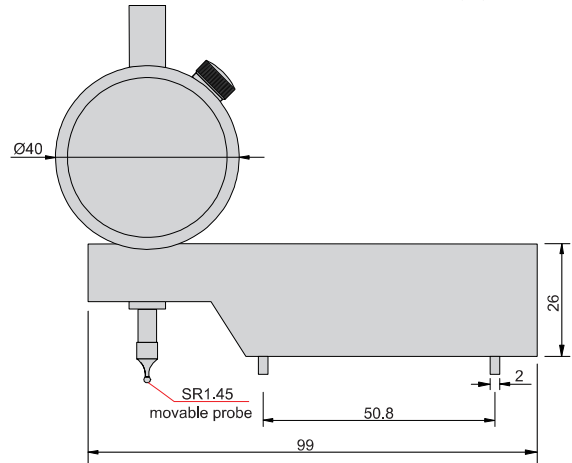

■ The run-out gauge is used to check the run-out thread root
and insure that the external thread is sufficiently long and is
a true run-out thread

Code	Range	Dial indicator graduation	Dial indicator stroke	Accuracy
2238-4	0-4mm	0.01mm	5mm	0.02mm
